### DETAILED ACTION

1. In view of Applicant's Preliminary Amendment filed on 7/22/03, the previous Restriction Requirement mailed on 02/26/04 is hereby vacated. The new Restriction Requirement is set forth below.

2. The preliminary amendment filed on 7/22/03 is incomplete because it does not state the status of original claims 9-14.

3. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 9-17 been renumbered as claims 15-23 according to 37 CFR 1.126.

5. Claims 9-23 are pending.

6. Claims 9-14 are objected to because they depend from canceled claims 1-8.

7. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 9-14, drawn to a method for treating fibrosis in a subject with a fibrotic condition with anti- $\alpha 1\beta 1$  antibody, classified in Class 424, subclass 143.1 and subclasses 139.1.
- II. Claims 9-14, drawn to a method for treating fibrosis in a subject with a fibrotic condition with anti- $\alpha 2\beta 1$  antibody, classified in Class 424, subclass 143.1.
- III. Claims 9-14, drawn to a method for treating fibrosis in a subject with a fibrotic condition with anti- $\alpha 6\beta 1$  antibody, classified in Class 424, subclass 143.1.
- IV. Claims 9-14, drawn to a method for treating fibrosis in a subject with a fibrotic condition with anti- $\beta$  antibody, classified in Class 424, subclass 143.1.
- V. Claims 15-22, drawn to a method for treatment of rheumatoid arthritis with antibody to an  $\alpha 1\beta 1$ , classified in Class 424, subclass 143.1.
- VI. Claims 23, drawn to a pharmaceutical composition comprising the antibody AJH10 secreted by a hybridoma designated as ATCC PTA-3580, classified in Class 424, subclass 143.1 and Class 530, subclass 388.22.

Art Unit: 1644

7. Groups I-V are different methods. Methods of treating differ with respect to ingredients (different antibodies); therefore, each method is patentably distinct.
8. Groups VI and (I and V) are related as product and process of using. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the antibody of Group VI can be used for affinity purification, in addition to the methods of treating recited.
9. These inventions are distinct for the reasons given above. In addition, they have acquired a separate status in the art as shown by different classification and/or recognized divergent subject matter. Further, even though in some cases the classification is shared, a different field of search would be required based upon the structurally distinct products recited and the various methods of use comprising distinct method steps. Therefore restriction for examination purposes as indicated is proper. Further, a prior art search also requires a literature search. It is an undue burden for the examiner to search more than one invention.
10. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the

Art Unit: 1644

prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

12. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
